EXPERIENCE

PSU Regional Research Institute — *Computer Support Technician*

May - August 2015, Portland, OR

- Provided technical support to staff members of the School of Social Research at Portland State University.
- Followed instructions from the supervisor on imaging computers, updating software, replacing hardware and other technical related tasks.

Parsons The New School for Design — *Learning Space Lab Aide*

August 2014 - March 2015, New York, NY

- Oversaw computer labs, video editing studios, music recording studios and print labs.
- Assisted students and faculty with troubleshooting software and hardware.

LGBT Campus Center, UW-Madison — *Communications Specialist*

2012 - 2013, Madison, WI

- Utilizing Adobe InDesign and Illustrator, I designed all publications including brochures, posters, and flyers for the Center and its associated events.
- Managed Center's website and its social media.
- Worked closely with with center staff on decision-making.

EDUCATION

Epicodus — *Full-stack Web Development*

August - December 2015, Portland, OR

I spend 8 hours a day coding with a partner, collaboratively building address books, to-do lists, and other apps in a variety of popular languages while implementing the concepts of BDD/TDD. I've learned how to start with a basic framework and then build on more features by utilizing resources around me and practicing effective communication through pair programming and sharing code. I feel tremendous strides in my knowledge in building new websites and apps as each week progresses at Epicodus.

University of Wisconsin-Madison — *BFA Graphic Design, cum laude*

2011 - 2013, Madison, WI

PROJECT

Face2Face — *Geolocation App, a group project at Epicodus*

September 2015, Portland, OR

The app objective is to motivate users to connect with each other more in person than online. It is built using PHP, MySQL database, PHPUnit, Silex, Twig, HTML, JavaScript, CSS and Bootstrap.
